

Parkville Frame Gallery

Newsletter "Supplement"

2022 Newsletter "Supplement" #22-1

Subject: Television Frames

Recently we have been receiving requests to make frames for wall-mounted televisions, especially for commercial applications. If you have a wall-mounted television in your home or business, consider how much more "finished" it would look when properly framed. We have an example on display in the gallery.

Subject: "Lighted" Frames

We have been experimenting with placing small, rechargeable, battery-powered LED lights inside some of our frame designs. Let us discuss some ideas for your next project. You might be surprised by the impact that lights can have on an overall composition, especially on sculpture pieces.

Subject: Name Plates

In past years, engraved "name plates" were often added to the bottom of picture frames to describe the artwork and the artist. These were especially popular for portraits (see the example below). We work with a local company that can produce appropriately sized name plates, usually in brass, that will add an element of interest and authenticity to your framed art.

Subject: Oversized Art

We can frame large (even very large) works of art. Don't be anxious about the size of your existing art, or your next project. We have framed many oversized pieces. Challenge us with your ideas. We will provide the solutions. See the next page for two examples.

The Art Advisor

Enjoy fine art--well framed
